

# THAMARA GERIG

• DEVELOPER •

---

## ABOUT ME

As a self-taught developer, I've spent the last four years building high-performance applications and mastering a variety of tech stacks. My experience ranges from delivering fast-paced, multi-project solutions to handling end-to-end product development in focused environments. I'm passionate about clean code, scalable systems, and constantly learning new technologies to stay ahead in the ever-evolving tech landscape.

## EXPERIENCE

### 2022 - Now | Software Engineer - [topi](#)

- Developed and maintained features from end to end using Go and React/TypeScript.
- Collaborated with multiple team members to bring new features to life, fostering a productive and innovative team environment.
- Led the migration of the authentication provider and several other key features, delivering a more seamless user experience.
- Refactored the design system to implement best practices, resulting in improved efficiency, consistency, and maintainability of the codebase.

### 2020 - 2022 | Front-End Developer - [Z1](#)

- Developed multiple Products using React, GraphQL, and Apollo.
- Worked closely with clients to meet project requirements, and desired functionalities.
- Focused on developing reusable, maintainable, and accessible components.

## STACK

- Frontend: HTML5, CSS3, JavaScript (ES6+), TypeScript, React, Redux, GraphQL, Apollo
- Backend: Go, SQL, REST APIs
- UI/UX & Design Systems: Figma, Tailwind CSS, Styled Components
- Testing: Jest, Cypress

## MISCELLANEOUS

- Co-organized [OSWeekends](#), a tech community in Madrid focused on creating and talking about open source.
  - I sometimes make repositories gathering things that have helped me along the way: one about [Interview Questions](#) and another gathering [JavaScript concepts](#).
  - I like doing fun [CodePens](#) in my free time and sharing what I learn on [Twitter!](#)
  - I've written some articles [here](#), summarizing programming concepts.
-
